Made in Sweden.

Patented/Patent Pending.

An efficient and flexible solution for both internal and external paint removal. Our unique scraping tools, suspension systems (with many adjustment possibilities) and The IR Paint Remover makes it possible for you to remove paint from façade and other items quickly and efficiently. Both hands are available for scraping and while working on one area, the next are warmed and prepared to scrape. The Speedheater Method™ is based on paint removal on wooden surfaces with Infrared technology. It is environmentally friendly and gentle to wood. It is recommended by the National Heritage Boards in Sweden, Finland and Norway.
